MC KEEN ASMA

Davao City 8000
mcasmakeen@gmail.com
+63932 390 0204

Experienced in frontend and full stack development, adeptly translating complex designs into functional code with ReactJS, React Native, Vue.js, Firebase, MySQL, MongoDB, and more. Skilled in improving UI/UX and achieving project success through collaborative problem-solving, deadline management, and mentoring junior team members, fostering efficient project delivery and skill growth.

Work Experience

Full Stack Developer | Mobile Developer
Faithful Development-Work from Home
April 2024 to Present

• Developed Web, Mobile and Backend solutions.
• Coordinate with manager regularly.

Front End Developer
Steelx Pty Ltd-Work from Home
November 2022 to April 2024

• During my time at Steelx, I focused on two key projects: an SVG-based shed layout renderer and a workflow designer. The shed layout renderer visualized intricate shed designs, including doors and bays, using SVG elements. The workflow designer outlined tasks in flow diagrams. Using ReactJS, TailwindCSS, and C#, I handled UI enhancements, bug fixes, and API integrations, collaborating with senior developers to improve my problem-solving and technical skills.

Frontend Developer
Tactiv Studios Design and Development-Work from Home
April 2022 to November 2022

• At Tactiv Studios, I specialized in translating intricate Figma designs into code, collaborating closely with designers to ensure precise implementation. This involved handling diverse design-to-code tasks with tailored npm packages from regular designer meetings. By employing ReactJS, TailwindCSS, and Angular, I enhanced UI solutions and integrated APIs, playing a pivotal role in achieving project milestones and optimizing outcomes.

Full Stack Web & Mobile Developer
WAL Software Solutions-Davao City
April 2021 to April 2022

• During my time at WAL Software Solutions, I handled diverse roles from maintaining legacy code to leading projects from inception. Working closely with my manager, I effectively set and met deadlines while guiding junior team members in code setup, bug resolution, and collaborative learning. I significantly contributed to projects like Trial Pulse (mobile frontend), OneStopSnap (fullstack mobile), Sureplus (fullstack web), and Sliver (fullstack web), utilizing technologies such as ReactJS, React Native,

Vue.js, Firebase, MySQL, MongoDB, and more. These experiences sharpened my leadership skills and technical awareness, ensuring efficient project delivery and robust skill enhancement.

Education

**Bachelor of Information Technology in Information Technology**
University of the Immaculate Conception - Davao City
June 2018 to June 2022

Skills

- angular (1 year)
- tailwindcss (3 years)
- c# (1 year)
- antd (1 year)
- trello (3 years)
- git (3 years)
- css3 (3 years)
- css (3 years)
- jira (1 year)
- bitbucket (3 years)
- vuejs (1 year)
- rest api (3 years)
- react native (3 years)
- npm (3 years)
- axios (3 years)
- bootstrap (1 year)
- laravel (1 year)
- nodejs (3 years)
- redux (1 year)
- html5 (3 years)
- github (3 years)
- TypeScript (3 years)
- MongoDB (3 years)
- wordpress (1 year)

WEB PROJECTS

Estimation View UI
SVG SHED LAYOUT

Technology Used
**React**, Javascript (Vanilla), SVG

Contributed to the development of a sophisticated SVG Shed Layout Renderer **utilizing svg elements to visualize intricate shed layouts**, including doors, opening bays, and other architectural features

Workflow Designer
WORKFLOW DESIGNER

Technology Used
**React**, TailwindCSS, Socket IO

Make use of real-time npm package socket.io for server-browser communication. **Modified a flow chart npm package to suit project needs**, providing a robust foundation for complex flow chart creation and visualization. Deployed the updated package to npm for team-wide use.

ulayaw.herokuapp.com
ULAYAW WEB-BASED CHATBOT

Technology Used
**React**, MongoDB, TailwindCSS, Heroku, OpenAI-GPT

Ulayaw is a web-based chatbot that assesses suicidal behaviors using the SBQ-R. **Using openai-gpt It provides responses based on schema-guided dialogue** and uses location-based services to ensure critical cases get immediate attention.

sliver.world
SLIVER NFT GAME (WEBSITE)

Technology Used
React, TailwindCSS, Nodejs, Context API

Sliver is a multi-platform 1v1 battle game. Build your team, choose your playstyle, and compete for rewards. Each character has unique skills and stats. Equip weapons, use element potions, and rank up to become the King of Sliver.
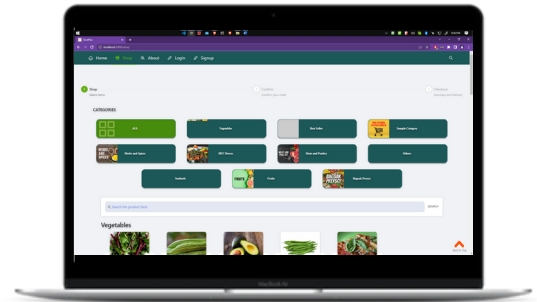

sarwisi.com

SARWISI

Technology Used

Angular, TailwindCSS, Bootstrap, Django

Sarwisi is a web platform connecting trusted taskers with local needs like home repairs, cleaning, and tutoring. Taskers get paid to work on their own schedule while helping busy parents.

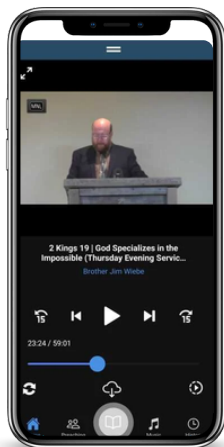

sureplus.net

SUREPLUS MARKET WEBSITE

Technology Used

React, TailwindCSS, antDesign

Sureplus is a Davao City social enterprise reducing food waste by reselling, repurposing, and reallocating surplus food. Our app connects food businesses with customers seeking affordable food, with unsold food made into products or distributed to the needy.
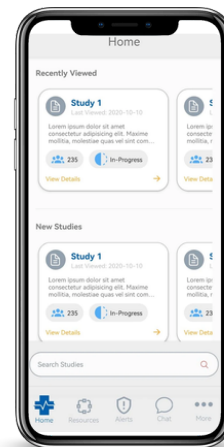

MOBILE PROJECTS

faithfulwordapp
FAITHFUL WORD

Technology Used
React Native, Typescript, Firebase, Zustand

Faithful Word is a platform offering over 10,000 Bible-based video and audio files. Available in English and Spanish, accessible via phone language settings.

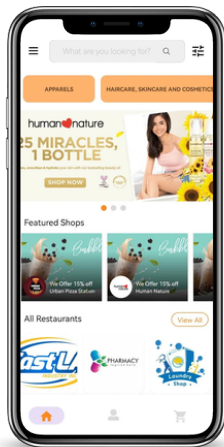

trial pulse
TRIAL PULSE

Technology Used
React Native, Typescript, Firebase, Zustand

App for Clinical Trials connects participants with clinical studies. Features include eligibility checks, scheduling, detailed information, alerts, and a table of contents.

oneStopSnap
ONESTOPSNAP

Technology Used
React Native, Typescript, Firebase, React Hook Form

One Stop shop is an online shopping featuring restaurant listings and a variety of products including apparel, haircare, skincare, cosmetics, and even pizza. Simply add items to your cart for a seamless shopping experience.
